

July 2025

Dear Valued Client,

ViroMed Laboratories was recently notified by Werfen, manufacturer of the Immucor Capture-CMV® assay, of a supply disruption to one of the assay's key components that is preventing the release of new reagent lots. This disruption is expected to last until at least the end of September 2025.

Due to this disruption in kit availability, ViroMed expects to exhaust its current supply of CMV reagents on or before the expiration date of August 8, 2025, for the kits currently on hand. At that time, ViroMed will begin redirecting CMV testing to Creative Testing Solutions, who will perform testing using an alternate FDA-approved donor CMV kit. There will be no changes to pricing or test numbers, and patient reports will be updated to reflect the methodology used and the laboratory that performed the testing.

We appreciate the opportunity to serve your testing needs. Please contact ViroMed Account Management at 800-582-0077 or [ViroMed\\_Acctmgmt@labcorp.com](mailto:ViroMed_Acctmgmt@labcorp.com) if you have any questions.

Sincerely,

A handwritten signature in black ink that reads "Ajay Grover". The signature is written in a cursive, slightly slanted style.

Ajay Grover, MS, PhD, BCMAS, HCLD (ABB)  
Laboratory Director  
ViroMed Laboratories
